Subject: Solicitation for additional NPCC Regional Standard Drafting Team Members for "Automatic Underfrequency Load Shedding Program" PRC-006-NPCC-01

Dear Sir/Madam,

NPCC has begun the development of the subject Regional Standard. At the September 4, 2008 meeting of the NPCC Reliability Coordinating Committee, the NPCC Task Force on System Studies was charged as the lead Task Force responsible for drafting this standard. In accordance with the NPCC Regional Reliability Standard Procedure, NPCC is soliciting for any *additional* interested candidates to assist with the drafting of the standard. The anticipated workload is 4-6 "in-person" meetings and about 4-6 teleconferences. Attached, is a self nomination form to be completed and returned by any interested persons no later than December 24th, 2008. The Regional Standards Committee RSC will review additional qualified candidates who self nominate and NPCC will notify the nominees in January 2009 of the RSC determination. Please distribute this email to any potential interested candidates. This information will also be posted on the NPCC website.

Sincerely,

Guy V. Zito
Assistant Vice President-Standards
NPCC
