

## Revenue Metering Sub-Committee Agenda:

Meeting: 10 May 2005 from 9:00 to 3:00

Agenda addition:

Submitted by: **Rodan Energy & Metering Solutions Inc.**

Issue: **Alternative Metering Standard**

With less than one year before the May 2006 deadline, there are concerns from MMPs and MSPs about the longevity of this relaxed standard and to what extent it may be invoked.

There are many MMPs who are “tenants only” at sites owned by others. As such, these tenant-MMPs do not own assets, only responsibilities and accountabilities under the Market Rules.

Where upgrade work is totally scheduled by the site owner, the tenant-MMP often finds that a 6-month delay is encountered between time of work commitment and completion.

With this time delay in mind, what pre-conditions are required from the tenant-MMP to IESO Settlements to allow the metering upgrade to be completed as per Alternative Metering Standard?

- signed Purchase Order/Agreement with site host
- Purchase Orders for materials/services from others
- Registration documents in queue at IESO
