

Measurement Canada IT Temporary  
Permission  
Update

Revenue Metering Sub-Committee Meeting  
May 10, 2006

# Measurement Canada IT Temporary Permission

---

- Extension granted by MC on June 10, 2004
- Temporary approval ends relative to the earliest seal expiry of the metering installation as follows:

<u>Earliest Seal Expiry</u>	<u>Temp Permission Expires</u>
2003	2009
2004	2010
2005	2011
2006	2006
2007	2007
2008	2008

- MC clear that further extensions will not be granted

# Measurement Canada IT Temporary Permission

---

- Additions can be made up to the end of 2005
- Many MMPs provided updates and additions
- Hydro One added ITs as place holders associated with Parallel CTs
- Increased the number of non-approved from 3,278 to 4,183
- As of the last update version issued December '05, 248 have been found approved and 261 are no longer used
- 3,674 ITs with Temp Permission remain in-service
- 16% No and 84% Not Found

# Measurement Canada IT Temporary Permission

IT expiry Year	Metering Installation Assigned to Networks	Meter Installations Assigned to Other MMPs				Total Number of ITs	Network TS Bus Meter Points
		Embedded	MTS, CTS, CGS	Network TS Feeder	Network TS Bus ITs

# Measurement Canada IT Temporary Permission

---

- Embedded and Customer sites – Convey- MMPs responsibility
- Network TS feeder – Abandon or Exit
- Network TS Bus – 45 meter points will likely not be done this year, Hydro One resources maxed out
- Non-compliance with MR and MC inevitable
- Hydro One and IESO agreeable to help MMP to apply to MC for extension or life time dispensation
- Power Measurement working on a tool to verify CTs
- MC Pattern approval is available, requires a sample IT to be sent to MC for testing, proof of match required
