Subject: Forecasts and Assessments Standing Committee

This e mail is being sent to the current members of the [Forecasts and Assessments Standing Committee](#) (FASC)

The IESO is proposing to the [current members](#) of the FASC that the regular scheduled committee meetings be finished and future input to the [18 Month Outlook](#) reports and other IESO assessments be provided to stakeholder.engagement@ieso.ca.

All outstanding action items of the Committee have been completed. The meetings of the past few years have either been cancelled or attendance has been under the minimum quorum of five as stated in the [Terms of Reference](#). This proposed change is primarily in response to both stakeholder and IESO requirements to focus resources on highest priority work.

The IESO remains committed to gather input from stakeholder to continue to improve our forecasting process. We propose the following as an alternative to the FASC:

That members send an e-mail to Stakeholder Engagement or your Account Manager for any suggestion for improvements to future outlooks or assessments. We will then evaluate if the change is minor and can be done quickly without further consultation, or if further input is needed. For the latter, we would will take one of two approaches:

1. Develop a [stakeholder plan](#) for all stakeholders, including FASC members to provide input on.
2. Consult with your [Stakeholder Advisory Committee](#) member, either through an information or input agenda item.

For general questions on an 18 Month Outlook, the best source is to contact either your Account Manager or Customer Relations at customer.relations@ieso.ca.

Please respond to stakeholder.engagement@ieso.ca by Friday, March 11 with your comments on this proposal or other suggestions. If you feel strongly that the Committee should continue please provide your rationale.

Thank you
